

FAECAL CULTURE TEST (COPROCULTURE) INCLUDING IDENT. ANTIBIOGRAM, IF APPLICABLE

Sample collection procedure

- collect a quantity of recently discharged stool indicatively the size of a walnut in a suitable container
- take care not to contaminate the sample with urine or menstrual blood
- fill the container to **half full**

Sample delivery procedure in the morning on the days established for sample collection:

- deliver the container/s to the Sample Collection Room staff, after registering, within 12 hours of collecting the sample

WARNING!

For these types of test there is no need to modify your diet

Every stool sample must come from a discharge on different days

For these tests, the sample can be stored at 2-8°
